

IMADH HUSSAIN

Full Stack Software Engineer

📞 +94 742 5586 94 ✉ immylance@gmail.com 🌐 imadh.com [in LinkedIn](#) [🔗 GitHub](#)

SUMMARY

Full-Stack Developer and Software Engineering student with hands-on experience building scalable web and mobile applications. Passionate about developing practical, user-focused solutions and continuously expanding technical expertise across modern software stacks. Demonstrated strong leadership, communication, and teamwork skills through roles as a STEM tutor and Club President, consistently taking initiative to drive technical projects and community events to successful outcomes.

AREAS OF EXPERTISE

Languages & Frameworks: React, Next.js, Laravel, Flutter, C# .NET, PHP, JavaScript, Python, Tailwind CSS

Databases & Cloud: MySQL, Firebase/Firestore, AWS, Azure, Vercel, Render

Tools & Architecture: Git/GitHub, Figma, REST APIs, Agile Development, OOP, MVC Architecture

EDUCATION

Reading for Bachelor of Engineering in Software Engineering

Oct 2024 – Present

University of Staffordshire

Colombo, Sri Lanka

- **Achievements:** 1st Place Winner - APIIT Mini Hackathon | Participant - APIIT Inter-University Hackathon | 1st Place Hult Prize Qualifiers

WORK EXPERIENCE

Vice President

Jan 2025 – Present

APIIT FullStack Computer Society

Colombo, Sri Lanka

- Lead the official tech club by organizing high-impact events including hackathons, coding workshops, and CTF competitions.
- Drive strategic planning and industry partnerships (e.g., WSO2) to bridge the gap between theoretical computing and real-world tech.

STEM Tutor

Jul 2024 – Jun 2026

Virtual Steps LK

Remote, Sri Lanka

- Provided personalized tutoring to 10+ students in mathematics and sciences, resulting in an average 40% test score improvement.
- Conducted interactive group classes utilizing engaging digital tools to simplify complex STEM concepts.

PROJECTS

CampusReserve (Web) | Laravel 12, Tailwind CSS, MySQL, REST API

[🌐 View on Portfolio](#)

- Solo-engineered a full-stack SaaS room booking platform utilizing Laravel Jetstream for robust authentication and session management.
- Built a highly reactive, component-driven user dashboard leveraging Laravel Livewire and Tailwind CSS.
- Developed and deployed a scalable REST API with Sanctum-protected routes to securely handle seamless mobile client integration.

NestTrack (Nestlé Lanka) | Next.js, Flutter, Firebase, Agile

[🌐 View on Portfolio](#)

- Engineered a cross-platform ecosystem to eliminate a 14-21 day reverse logistics bottleneck caused by manual tracking using Agile Project Management.
- Developed a Flutter mobile app featuring QR scanning and mandatory photo evidence, synced with a real-time Next.js web dashboard.
- Structured the database to manage tracking of specific product arrays, successfully handling custom records.
- Navigated mid-sprint architectural pivots to deploy an automated triage engine based on strict peer feedback.

CampusReserve (Mobile) | Flutter

[🌐 View on Portfolio](#)

- Solo-developed a responsive booking app utilizing Flutter and Provider, implementing SharedPreferences caching for offline resilience.
- Integrated native device sensors (Geolocation, Accelerometer) to enable advanced mobile interactions and real-time spatial data processing.

Inventory Management System | C# .NET, MySQL

[🌐 View on Portfolio](#)

- Engineered a production-ready system utilizing a 3-tier architecture to decouple Presentation, Business Logic, and Data Access layers.
- Implemented advanced OOP principles and secured data integrity through parameterized SQL queries.

Aegis | PHP, MySQL, JavaScript

[🌐 View on Portfolio](#)

- Co-developed a Rapid Response System prioritizing availability over connectivity through an Offline-First PWA architecture. Hackathon winning project.
